Academic Experience

Positions

- **Assistant Professor, Charles University, Prague**, 2022 – present
I joined the [Department of Distributed and Dependable Systems](#) at Faculty of Mathematics and Physics to pursue fundamental research on simple, open and trustworthy programming systems, using theoretical, applied and interdisciplinary research methods.
- **Lecturer, University of Kent**, 2018 – 2022
As a member of the [Programming Languages and Systems](#) group, I worked on making programming with data easy, trustworthy and accessible. I applied for grants from [EPSRC](#) (UK) and [ERC](#) (EU), [Dstl & GCHQ](#) (UK), taught graduate and undergraduate modules, supervised a PhD student and initiated interdisciplinary collaboration with a colleagues from [Department of Philosophy](#).
- **Collaborating Fellow and Visiting Researcher, The Alan Turing Institute**, 2016 – 2020
I led a project [Programming Tools for Open Data Journalism](#) funded through [Google Digital News Initiative](#), joined the flagship ATI project [Artificial Intelligence for Data Analytics](#) as a co-investigator and obtained funding from [Dstl and GCHQ](#) for a follow-up project on semi-automated data wrangling.
- **Post-doctoral Researcher and Contractor, Microsoft Research Cambridge**, 2014 – 2016
I led the development of an open-source projects focused on doing data science with F#. Resulting research was awarded a [Distinguished Paper](#) award and selected as an [SIGPLAN Research Highlight](#).

Education

- **PhD, Computer Laboratory, University of Cambridge**, 2011 – 2016
Thesis [Context-aware Programming Languages](#) develops coeffects, a theory for tracking information about environment in which programs are executed. I also devised a novel way of presenting the results in the form of widely read interactive essay (tomasp.net/coeffects). Supervised by [Prof. Alan Mycroft](#).
- **BSc and MSc, Computer Science, Charles University, Prague**, 2004 – 2010
MSc completed with distinction. Final thesis [Reactive Programming with Events](#), supervised by Dr Don Syme, developed abstractions for reactive and concurrent programming that were presented in workshop papers.
